

Summer '23 Internship

SUSTAINABLE FOOD FUTURES IN BAJA CALIFORNIA, MEXICO

United States Department of Agriculture
National Institute of Food and Agriculture

Take your academic career to a higher level!

The California Floristic Province is a biodiversity hotspot that has a wide variety of native plants that are edible and have an important cultural and ecological role supporting humans, pollinators and other animals. During this internship we will travel to a tribal community in Baja California to learn the ethnobotany Kumeyaay and the importance of using native plants in our edible gardens in a sustainable way. We will learn how to harvest, process and cook native plants and use them to make artifacts to store food.

Program Details

- ✓ **Dates:** June 2 to 9
- ✓ **Instructor:** Lluvia Flores Renteria
- ✓ **Scholarships available**
