

Summer '23 Internship

SUSTAINABLE FOOD FUTURES IN OAXACA, MEXICO

United States Department of Agriculture
National Institute of Food and Agriculture

The Sustainable Food Futures (SFF) Internship aims to provide innovative solutions to food security through interdisciplinary collaborations, incorporation of indigenous knowledge, and the development of a pipeline of diverse specialists with flexible skillsets in the fields of food and agriculture.

The SFF Internship will be conducting an ethnographic field study in Oaxaca, Mexico for the summer. Students will work alongside farmers and their families as they learn and document traditional Indigenous agricultural practices.
